BACKGROUND

The Integrated Querying and Reporting Service (IQRS) is a web-based tool designed to provide the national health care community with an automated query and reporting interface capability to the National Practitioner Data Bank (NPDB) and the Healthcare Integrity and Protection Data Bank (HIPDB). In an effort to ensure that IQRS remains a valuable and user-friendly system, the Practitioner Data Banks Branch (PDBB) NPDB-HIPDB Operations and Administration Branch has established an IQRS User Review Panel (URP).

The IQRS URP is a forum where users of the NPDB-HIPDB can gather to openly discuss and/or express their ideas about past, present and future IQRS/Data Bank operations. The IQRS URP consists of various entities that represent reporters, queriers, and third-party users. The primary mission of the IQRS URP is to discuss issues regarding IQRS; identify new IQRS requirements; review current IQRS querying and reporting issues; and address NPDB and HIPDB operational related issues.

GENERAL AGENDA

- | | |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------|
| 9:00 AM | Continental Breakfast |
| 9:30 AM | Call to Order and Welcome
